Feeding South Florida is committed to transforming lives by providing immediate access to nutritious food, leading hunger and poverty advocacy efforts and through innovative programming and education. Feeding South Florida rescues more than 40 million pounds of food per year. Before it can be distributed, the products need to be inspected and sorted to ensure food is safe for consumption.

Easter Seals assists more than one million children and adults with disabilities and their families annually through a nationwide network of more than 450 service sites. Each center provides top-quality, family-focused and innovative services tailored to meet the specific needs of the particular community it serves. Easter Seals has been helping individuals with disabilities and special needs, and their families, live better lives for more than 80 years. Whether helping some improve physical mobility, return to work or simply gain greater independence for everyday living, Easter Seals offers a variety of services to help people with disabilities address life's challenges and achieve personal goals.

Easter Seals also advocates for the passage of legislation to help people with disabilities achieve independence, including the American with Disabilities Act (ADA). Passed in 1990, the ADA prohibits discrimination against anyone who has a mental or physical disability, guaranteeing the civil rights of people with disabilities. This heart-felt commitment to helping people with disabilities and their families is what Easter Seals is all about.

The Environmental Protection and Growth Management Department was created in 2008 when Broward County merged its urban redevelopment and planning functions with those of environmental protection, emergency management and consumer protection. The consolidation created a combined pool of talent and resources that will enable Broward County to address the issues and opportunities of our community with efficiency, creativity and innovation.

The mission of the Environmental and Growth Management Department is to safeguard lives, natural resources, and property of residents and visitors by providing for natural resource planning, management and protection, planning for appropriate land use/housing patterns and establishing an incident command system and emergency operations plans, enforcing environmental, development and construction regulations and providing for consumer protection.
